About

Through the years, I gathered various knowledge in web development. HTML5, CSS3, jQuery, PHP, Vanilla JavaScript are the most common techniques I use in my everyday work. On different occasions, I worked both, as a part of a team and as a solo developer. Building WordPress websites, themes from scratch, custom functionality, woocommerce, increasing security and daily maintenance, including weekly updates and backups. Along WordPress I worked as a part of the team on React JS projects, building components, and doing the styling of other parts through the project.

Experience

IM Republic - 2013 - 2020

Senior Web Developer

Developed various websites using WordPress, custom themes build from PSD files made by designers. Developed websites using HTML5, CSS3, jQuery, PHP. As a team member did some work on React project, mainly developing components and styling other parts through the project.

Coba and Associates - 2012 - 2013

Senior Web Developer

As a single developer, worked on various projects, mainly static websites, developed with HTML5, jQuery, CSS3, PHP, and worked on few projects using Drupal. Custom websites made from PSD and AI designs prepared by designers.

Verano Marketing - 2009 - 2012

Senior Web Developer

As a single developer, worked on various company sites including websites for Peugeot, Zira Hotel, Verano Group... Used technologies like HTML5, jQuery, PHP, CSS3, Flash. All websites made from scratch, based on PSD designs.

Pionir Subotica - 2007 - 2009
